Dear Hiring Manager,

I am excited to apply for the Full Stack Developer position at your organization. With hands-on experience in developing scalable web applications using PHP, Java, Spring Boot, Laravel, React, MySQL, JavaScript, HTML, CSS, and REST APIs, I am eager to contribute my technical expertise and problem-solving skills to your team.

Currently, I work as a Full Stack Developer at Ultronic, where I develop and maintain web applications, integrate RESTful APIs, optimize database performance, and deploy applications on Linux servers. Previously, as a Java Full Stack Developer Intern, I built secure REST APIs using Spring Boot, Hibernate, and JWT authentication while following Software Development Life Cycle (SDLC) best practices.

I have worked on several real-world projects, including a Hospital Management System, Stock Management System, Fleet Management System, and a Smart Library Access & Attendance System. These projects have strengthened my ability to build robust backend systems, design responsive user interfaces, optimize SQL queries, and deliver reliable software solutions.

I am passionate about learning new technologies, writing clean and maintainable code, and collaborating with teams to solve complex business problems. I am confident that my technical skills, adaptability, and commitment to continuous improvement would make me a valuable addition to your organization.

I have attached my resume for your consideration. I would welcome the opportunity to discuss how my skills and experience align with your team's needs. Thank you for your time and consideration. I look forward to hearing from you.

Sincerely,

Rohan Navnath Kurne
